Dear everyone teaching at CogSci in the fall semester (2026)

I've previously announced that I'd distribute a link to a datacamp course for the students to freely use the datacamp resources for whatever coding/ML courses they might like to brush up on.

Here's that link (the course is called Decision making - cuz it has to be linked to an actual course that I'm teaching):

https://www.datacamp.com/groups/shared_links/b15bf4bf2523af06ae25aa7ed8fd31d5b225b61d635aec05ef6995f1be347367

And don't forget to let them know that they should use their @uni.au.dk email address. Cuz that's the domain that is registered with the classroom.

This is just meant to be a service to the students (that they've asked for) - and that you can thus just share as a link via Brightspace - or whatever works for you.

Best,
/a
